

Safechem Chemicals data - Use and Dilution

Greaseshift Concentrate

Greaseshift is a concentrated workshop degreaser containing detergents and emulsifiers to clean engines and other mechanical equipment parts

Readily emulsifies with water. Removes hydrocarbon animal & vegetable based oil & grease. Contains an optimal blend of wetting agents and emulsifiers to suspend both liquid and solid particulate soils such as carbon.

Apply to any water resistant surface

Use as supplied

non residual leaving components clean and dry

May be used in dipping tanks or applied by brush or spray to the surface in need of treatment. Dilute with Paraffin if required

Apply the product and let the solution soak for 5 minutes. Scrub surfaces if necessary, using a stiff bristle brush.

When soil deposits become loose remove to an appropriate area and rinse well using clean water. Wipe surfaces and allow to dry
